SOURCE Zarya Vostoka.THE STATE BUDGET OF THE GEORGIAN SSR FOR 1952

[Numbers in parentheses refer to appended sources.]

The following tables were compiled from figures contained in the budget speech of the Minister of Finance Georgian SSR. It should be noted that in the breakdown of allocations to the national economy the category "capital investments" represents a functional distribution of allocations and is not to be construed as representing additional expenditures from the budget over the allocations to the various branches of the economy. Furthermore, the breakdown of national economic and social and cultural activities is not necessarily complete and the figures, therefore, do not always add up to the total for these main categories.
